

# Alexander Roberts

Desktop Support Leader | IT Support Operations | Systems Administration  
alexroberts66@gmail.com | linkedin.com/in/alexroberts66 | St. Louis Metro Area

## PROFESSIONAL SUMMARY

Desktop support operations and systems administration professional with nearly a decade of experience spanning endpoint support, technical escalation, enterprise application administration, service management, access governance, user training, workflow improvement, technical leadership and automation. Known for resolving complex support issues, translating repeated user issues into SOPs, and turning support data into clear reporting for leadership and stakeholders. Strong background documenting knowledge resources, mentoring technicians, supporting Windows/Microsoft 365 environments, and implementing practical AI and automation tools to improve service delivery.

## CORE COMPETENCIES

- |                                 |                                             |                                 |                                  |
|---------------------------------|---------------------------------------------|---------------------------------|----------------------------------|
| • Corporate IT Support          | • Technical Escalation                      | • Endpoint Support              | • Systems Administration         |
| • Identity & Access Management  | • Active Directory / Azure Active Directory | • User Permissions              | • Access Governance              |
| • MDM Administration / AirWatch | • Windows 10/11                             | • Microsoft 365                 | • Enterprise SaaS Administration |
| • Application Support           | • Ticket Triage                             | • Incident Management Workflows | • ITSM / Service Management      |
| • Knowledge Base Documentation  | • User-Facing Documentation                 | • Training & Coaching           | • Technician Mentoring           |
| • Stakeholder Collaboration     | • Cross-Functional Communication            | • Process Improvement           | • Workflow Standardization       |
| • Support Data Analysis         | • KPI Reporting                             | • Power BI / Power Query        | • SharePoint                     |
| • PowerShell Automation         | • GenAI Productivity Tools                  | • Troubleshooting               | • Networking Fundamentals        |
| • Diagnostic / Audit Logs       | • Endpoint Connectivity Troubleshooting     | • Vendor Coordination           | • Change Management              |

## PROFESSIONAL EXPERIENCE

### Thompson Coburn LLP | Litigation Technology Case Manager | Mar 2023 - Jun 2026

- **Enterprise SaaS & Application Support:** Owned technical workflows for Relativity, Microsoft Purview, and eDiscovery-related platforms. Supporting complex user issues, platform configuration, data import tasks, processing errors, AI analytics, review, and production workflows.
- **Technical Escalation & User Experience:** Served as a trusted escalation point for non-standard application, data, workflow, and user-support issues. Translated repeated user issues into SOPs, repeatable workflows, and clear escalation paths for legal and technical staff.
- **User Data and KPI Reporting:** Collaborated with management to pioneer new methods of reporting on KPIs across the department. Provided visibility on metrics such as re-work incidents, task or billing errors, and storage costs. Used tools such as Power Query, Power BI, Sharepoint lists, Relativity audit logs, and scripts to provide clear analytics data to all management including C-suite.
- **Documentation & Knowledge Management:** Centralized departmental knowledge resources into shared OneNote. Created user-facing documentation and repeatable procedures, reducing re-work incidents by 36% and saving an additional 6 hours per month through templates, automations, and workflow adjustments using reporting workflows I created.
- **Technical Leadership & Staff Development:** Served as a functional lead for junior team members building their technical competency from onboarding through independent delivery by coaching department workflows, client communication, issue ownership, workload prioritization, and support quality standards. Contributed substantive performance feedback to management for annual reviews.
- **GenAI & Automation Tools:** Researched and implemented ChatGPT, Microsoft Copilot, eDiscovery AI, and Harvey in practical workflows. Authored PowerShell automations for medical data processing and PDF document merging that saved 25 hours per month and expanded service offerings.

### U.S. Department of Justice | Litigation Technology Support Specialist | Jul 2021 - Mar 2023

- **Workflow Standardization & Stakeholder Collaboration:** Collaborated with senior management, including the U.S. Attorney, First Assistant U.S. Attorney, and Administrative Officer, to standardize collection, processing, and production workflows for a newly created litigation technology unit.
- **Enterprise Platform Implementation & User Adoption:** Led implementation and adoption initiatives for Relativity, Everlaw, iPro Eclipse, and Adobe Creative Cloud. Created training plans and supported legal staff through issue resolution, repeatable procedures, and direct user guidance.
- **Automation & Support Efficiency:** Developed PowerShell scripts to automate routine legal support tasks, improving consistency, reducing manual effort, and saving approximately 70 hours per month.
- **Access Governance, Compliance & Process Control:** Improved operational logging and compliance support through permission standardization, auditing, and process control in a high-security federal environment.

### Blackstone / BAE Technologies | IT Support Contractor | Jul 2019 - Jul 2021

- **Corporate/Federal IT Support & Systems Administration:** Owned IT support and systems for three offices, including networking, security, patching, asset management, permissions, group policy, endpoint support, and user experience.
- **Identity, Permissions & Access Governance:** Created and led a major effort to standardize user permissions across network shares, reducing operational risk and improving support consistency.

- **Service Management, Change & Incident Workflow:** Managed change management, impact analysis, feasibility analysis, and scaling projects for the district, requiring communication with high-level stakeholders and a strong working relationship with the user base.
- **Endpoint Support & Connectivity:** Supported Windows endpoints, endpoint security, hardware and software issues, user permissions, network shares, and connectivity-related troubleshooting across federal offices.
- **Knowledge & Information Access:** Designed and deployed an office-wide SharePoint site for centralized document template management and improved information access. Created automated PDF forms that saved legal staff tens of hours on repetitive filings.

#### Anova Furnishings | IT Support Specialist | May 2018 - Jul 2019

- **Corporate IT Support & Systems Administration:** Owned IT support for an office and manufacturing environment, including hardware, software, user support, endpoint needs, and legacy application workflows.
- **User Training & Application Support:** Supported security training, legacy Epicor implementation, custom Excel plugin workflows, and quarterly technology reviews with plant technology leads.
- **Vendor Coordination & Infrastructure Planning:** Served as the primary point of contact for technology vendors and managed service providers. Coordinated infrastructure changes, cost justification, and technology planning.
- **Service Management & Disaster Recovery:** Implemented and maintained disaster recovery procedures while improving request routing and escalation workflows through documented processes and service-management rules.

#### Intelliteach / Frontline Managed Services | Service Desk Analyst | May 2017 - May 2018

- **Service Desk Intake, Triage & Incident Support:** Provided first-line service desk support for law firm end users, including ticket intake, issue triage, troubleshooting, escalation, and resolution documentation. Averaged 50 closed tickets per day and a 94% first-contact resolution rate.
- **Endpoint, Account & Application Troubleshooting:** Resolved endpoint, account, application, printing, connectivity, and Microsoft Office issues while identifying recurring patterns that required escalation or process improvement.
- **Knowledge Base & Analyst Mentoring:** Mentored new analysts on SOPs, knowledge base use, proprietary ticketing system workflows, and user communication. Documented recurring problems and routing guidance.

#### TECHNICAL SKILLS

---

**Systems & Support:** Windows Server 2012/2016/2019; Windows 10/11; Microsoft 365; Active Directory; Azure Active Directory; AWS Cloud; endpoint support; provisioning; image management; MDM / AirWatch; endpoint security; hardware maintenance

**Enterprise Platforms & SaaS:** Microsoft Purview; Relativity; Everlaw; iPro; Salesforce; FreshService; ServiceNow user exposure; Agility Blue workflow administration; SharePoint 2013/2016; Adobe; Epicor; Mimecast

**Automation & Reporting:** PowerShell; Python; JavaScript; Bash; Visual Basic; SQL queries; Power Query; Power BI; SharePoint Lists; audit logs; KPI reporting

**ITSM & Service Management:** ticket triage; incident management workflows; request routing; approval workflows; escalation processes; change management; service delivery documentation; knowledge base documentation

**AI / Productivity Tools:** ChatGPT; Microsoft Copilot; eDiscovery AI; Harvey; technical workflow automation

#### CERTIFICATION

---

Relativity Certified Administrator - Certified in administration of complex relational database software for eDiscovery.
